

年好！

Happy Chinese Tiger Year!

National Report on Tiger Conservation in China

**Some Actions after the
Global Tiger International
Workshop -- Kathmandu**

1.China State Forestry

Administration issued special document in December 2009:

- ◆ Strengthen and enhance the conservation of wild tigers and their habitat, prey animals;**
- ◆ Combat smuggling of and illegal trade in tiger products;**
- ◆ Continue to seal the dead tigers and their separated parts.**

2. Workshop of CITES' Law enforcement in the south and southwest of frontier provinces in December, 2009

3. The national meeting of nature reserve management and establishment in December 23-24, 2009.

**We paid 600,000 RMB yuan
(80,000 US\$) to compensation
on local peoples' injuries and
property damages by tigers'
and other animals in Jilin
Province in 2009**

National Priority Actions of China in Global Tiger Conservation Strategy

1. To enhance the conservation of wild tigers, by undertaking projects for the improvement of the habitat and restoration of their prey to ensure the increase and expansion of wild tiger population.

2. To further strengthen law enforcement on tiger conservation and the combat against any smuggling and other illegal activities related to tiger products.

3. To continue to implement the bilateral agreements on tiger conservation with Russia and India.

In addition, to cooperate with neighboring countries on combating the crimes of the smuggling of tiger products at frontier areas,

Within China's legal framework, actively participate in global tiger conservation.

The goal -- 7000
the global wild tiger in 2022.

We need a guiding strategy and action plan:

- ◆ **such guiding strategy and action plan shall be studied and testified scientifically and rigorously;**

- ◆ **indicate the regions, implementing agencies, specific tasks and measures;**

We are facing challenge:

- ◆ **The basic information of many wild tiger range areas is unclear;**
- ◆ **No special executing agency for tiger conservation;**
- ◆ **Controversy still exists between different specialists of opinions;**
- ◆ **The presumptions or ideas for tiger conservation differ;**

- ◆ **Investment estimation reference is unclear;**
- ◆ **Conflict between human and tiger are not effectively mitigated;**
- ◆ **appropriate attention has not been paid to the production and living of people inhabited in tiger range areas.**

**To establish a working
group consist of multi-
disciplinary experts**

**China will continue to
pay much attention to the
cooperation on tiger
conservation**

Further enhance communication and exchange with all tiger range countries and conservation organizations, scientifically deliberate the global wildlife conservation strategy and action plan.

Can I say Thank you?
